

Lost Landscapes & Learning

Volunteers Needed - for Dig Day

As part of the Lost Landscapes and Learning project that your school is involved in, a wildflower meadow is being created in the school grounds.

The meadow will make a fantastic addition to the grounds for all pupils. Not only will it add great colour but will be a valuable real life learning tool, the children will learn all about the wildlife that is dependent upon it and the importance of flowers and nature.

Children will be involved in designing the layout of the meadow and helping to sow the seeds – but we need lots of hands to help us first remove some grass.

No experience is necessary, just plenty of enthusiasm. If you can not manage the whole session then you are welcome for however long you can dig for.
